

OXY QUÍMICA E METALÚRGICA LTDA

Environmental Policy

Environmental policy

Oxy Química e Metalúrgica Ltda is a company whose activities are the production and sale of Antimony Trioxide and the resale of chemical products and metals. Located in the municipality of Juquitiba/SP- Brazil, it is aware of its responsibilities towards the environment.

We focus on knowing and minimizing the environmental impacts associated with our activities and products, with emphasis on waste generation, atmospheric emissions and the use of natural resources.

Our commitment is to implement and maintain the Environmental Management System, meeting the relevant legal requirements and conducting the company's actions with respect to the environment, continuously improving our Environmental Management System processes.

We undertake to:

- Identify the environmental aspects and impacts derived from operations, seeking to protect soil, water and air;
- Comply with legal requirements and environmental standards applicable to our organization's activities;
- Promote broad awareness of environmental issues among employees, through training and qualification programs for everyone involved in the production chain;
- Manage the Environment contingencies, seeking to act on opportunities for improvements aimed at eliminating and/or reducing risks and preventing pollution.
- Promote the correct management and disposal of waste in its production chain, in order to protect the environment from air, soil and water contamination;
- Continually improve the Environmental Management System;
